

ParkSafe Gas Detection & Ventilation Control System

Product Overview:

The ParkSafe Controller is designed for installations into car parking facilities and enclosed garages. Each Merlin ParkSafe Detector (Nitrogen Dioxide) and (Carbon Monoxide) is powered directly from the Merlin ParkSafe controller and communicates data through Modbus RTU. Up to 16 detectors can be powered/controlled by theParkSafe, each detector can cover a 50ft radius.

The system can automatically control ventilation systems according to gas levels and an optional temperature levels. The ParkSafe is capable of activating both the exhaust fan(s) and the air intake device(s) such as outside air louvers/dampers and make up air units.
